On November 16th, during WINDFORCE BALTIC SEA offshore wind conference in Gdansk, Poland, J.S. Hamilton Quality Services (JSHQS) and STEEL INSPECT have officially signed a Partnership agreement for cooperation. The parties acknowledged their willingness to cooperate in the field of Inspection and Expediting Services, particularly for Wind Energy Projects, considering Steel Inspect's long years' experience in the wind energy sector on the one side and J.S. Hamilton's experience in industrial services in Poland and other East European countries on the other.

In order to develop and pursue professional services, and specifically for upcoming Baltic offshore wind farm projects in Poland, the Parties decided to enter into the Partnership Agreement.

Piotr Tkaczyk, Managing Director of J.S. HAMILTON QUALITY SERVICES says "We are very pleased to make this strategic agreement with Steel Inspect. Doing so extends the depth of expertise both parties can offer and presents opportunities to broaden our scope of services into the accelerating Polish offshore wind market".

Tobias Frey and Maik Rienecker, Managing Directors of STEEL INSPECT add "We are very happy to join forces with the reputed Polish quality services company J.S. Hamilton QS, as on the one hand it establishes us in Poland to strategically continue our support to the offshore wind energy sector in Poland and on the other hand we can benefit from their excellent reputation.".

J.S. HAMILTON QUALITY SERVICES sp. z o.o is a-Polish company providing a wide range of specialized services for traders, retailers, producers, industry, transport, distribution and storage.

For more information, visit www.jshqs.com.pl .

STEEL INSPECT is a quality consultancy company head quartered in Albbbruck, Germany, that partners with the offshore wind energy sector (worldwide) in securing quality for all steel components for large-scale offshore wind farm construction projects, offering a unique total quality management concept to secure quality for complete EPCI projects: the „Q7“concept.

For more than 12 years we have supported our clients in major Wind Farms projects in Europe and overseas.
